In the last months of the Second World War, Gerhard Boldt, a young cavalry officer, found himself seconded to Gehlen's military intelligence staff in Berlin. Summoned to daily briefing sessions with the Fuhrer and his Generals, Boldt had a unique opportunity to observe the leading members of the Nazi

hierarchy."

Harp uses the familiar figure of Bibendum and the promotional campaigns designed around him to analyze the cultural assumptions of "belle-epoque" France, including representations of gender, race and class. He also considers Michelin's efforts to promote automobile tourism in France and Europe through its famous "Red Guide" (first introduced in 1900), noting that, in the aftermath of World War I, the company sold tour guides to the

battlefields of the Western Front and favourably positioned France's participation in the war as purely defensive and unavoidable. Throughout this period, the company successfully identified the name of Michelin with many aspects of French society, from cuisine and local culture to nationalism and colonialism.

Why do road cyclists go to the mountains? Many books tell you where the mountains are, or how long and how high. None of them ask 'Why?' After all, cycling up a

mountain is hard – so hard that, to many non-cyclists, it can seem absurd. But, for some, climbing a mountain gracefully (and beating your competitors up the slope) represents the pinnacle of cycling achievement. The mountains are where legends are forged and cycling's greats make their names. Why are Europe's mountain ranges professional cycling's Wembley Stadium or its Colosseum? Why do amateurs also make a pilgrimage to these high, remote roads and what do we see and feel when we do? Why are the roads there in the first place? Higher Calling explores the central place of mountains in the folklore of road cycling. Blending adventure and travel writing with the rich narrative of pro racing, Max Leonard takes the reader from the battles that created the Alpine roads to the shepherds tending their flocks on the peaks, and to a Grand Tour climax on the 'highest road in Europe'. And he tells stories of courage and sacrifice, war and love, obsession and elephants along the way.

Dior and His Decorators is the first work on the two interior designers most closely

associated with Christian Dior. Like the unabashedly luxurious fashions of Dior's New Look, which debuted in 1947, the interior designs of Victor Grandpierre and Georges Geffroy infused a war-weary world with a sumptuous new aesthetic--a melding of the refined traditions of the past with a wholly modern sense of elegance. Author Maureen Footer recounts the lives and work of this influential trio, illustrated with a trove of evocative vintage photographs. Grandpierre designed Dior's first couture house, creating not only the elegantly restrained look of the salons but also the template for the Dior brand, including typeface, logo, and packaging. Both Grandpierre and Geffroy (who worked independently) designed the interior of Dior's townhouse. After the couturier's untimely death in 1957, Grandpierre and Geffroy went on to design salons for other couturiers, as well as homes for the likes of Yves Saint Laurent, Marcel Rochas, Gloria Guinness, Daisy Fellowes, and Maria Callas.

Rory Fox challenges the traditional understanding that Thomas Aquinas believed that God exists outside of time. His study investigates the work of several mid-thirteenth century writers providing a wealth of material on medieval concepts of time and eternity.

As a companion to his previous volume *Night in the Middle Ages*, Jean Verdon offers insight into the pitfalls and perils of travelling during medieval times. Travel in the Middle Ages is filled with the stories and adventures of those who hazarded hostile landscapes, elements, and people - out of want or necessity - to get from place to place. Verdon contends that a journey in the current sense, suggesting both the movement of a person who

travels to a fairly distant place and philosophical ideas of distraction and flight from self, did not exist in the Middle Ages. Indeed, he says, nothing either in the means of communication or in the landscape encouraged travel. And yet, Verdon points out, the world of the Middle Ages was one of unceasing movement.

A New Physical Geography Pen & Sword
At the same time that Emperor Septimius Severus was ordering the building of his triumphal arch in Rome, around 203 AD, a large fleet from Norway sailed through Kattegat. Nithijo, Wagnijo, Swarta and 1000 other warriors attacked Eastern Jutland, but were decisively defeated. "Clothes were shredded and armour was torn apart" wrote the Spanish priest and historian Orosius around 400 AD. We can add that shields were smashed, swords were bent and broken and horse harnesses were chopped into pieces. Then the wrecked spoils of war were sacrificed in a lake at Illerup. This book gives an account of the excavation and the detailed studies arising from one of the most impressive archaeological finds of our time, and the reader gains an insight into

previously unknown and very surprising aspects of life in the Iron Age. Book jacket.
