I have found the ATI NurseNotes Maternal-Newborn text to be extremely useful in the undergraduate family health course that I teach. Its concise review of all of the essential content makes it an extremely user-friendly text, particularly for students who struggle as they try to take in a tremendous amount of material during the 14 week semester. Many of my previous students have sworn that they never would have successfully completed all of the course objectives without this volume. Linda Walsh, Faculty, University of San Francisco
 The best features of this book: 1. Concise, short chapters followed immediately by practice questions, right after you have studied a topic. 2. An excellent framework for making your own condensed notes, to facilitate quick review. 3. Complete

outline of each topic at the beginning of each chapter. 4. Use of unique symbols and boldface and italic type will help you to quickly identify each of the steps of the nursing process, hands-on nursing care, diets, medications, lab and diagnostic tests, and test-taking tips. 5. A FREE DISK with additional questions (with alternate item format) is also included for further practice and self-assessment.

PN Pharmacology for Nursing Lippincott Williams & Wilkins

For all courses in maternal and child nursing care in any nursing program. This dynamic, up-to-date text offers an integrated framework and philosophy for teaching the nursing of childbearing families and nursing of children together. Accurate, readable, and concise, *Maternal & Child Nursing Care* supports faster and more efficient learning in briefer, more compressed courses; while helping students develop essential skills for fast-changing healthcare environments. Core themes in this edition include family-centered and community-based care; health promotion (including Healthy People 2020); patient and family education; clinical reasoning; evidence-based practice, and developing cultural competence. This edition adds new Safety Alerts; more coverage of pain as the fifth vital sign; greater focus on care of families where a child is dying; and updated content on assessment, nutrition, communication, and many other key topics. Multiple pedagogical tools help students focus both learning and review, including intuitive Pathophysiology Illustrated visuals; Family Quotes presenting the family's perspective; Learning Outcomes and Critical Concept Review Features; Key Terms, and an online audio glossary.

Disease Control Priorities, Third Edition (Volume 2) Elsevier Health Sciences

Part of the popular LPN Threads series, *Introduction to Maternity & Pediatric Nursing* provides a solid foundation in obstetrics and pediatric nursing. An easy-to-follow organization by developmental stages, discussion of disorders by body system from simple-to-complex and health-to-illness, and a focus on family health make it a complete guide to caring for maternity and pediatric patients.

Written in a clear, concise style by Gloria Leifer, MA, RN, this edition reflects the current NCLEX® test plan with additional material on safety, health promotion, nutrition, and related psychosocial care. Cultural Considerations boxes and a Cultural Assessment Data Collection Tool help in developing individualized plans of care. Updated health promotion content includes Health Promotion boxes focusing on preventive strategies for achieving prenatal wellness, health during pregnancy, postnatal health, and pediatric illness prevention and wellness -- including the complete immunization schedules for all ages. Nursing Tips provide information applying to the clinical setting. Objectives are listed in each chapter opener. Key terms include phonetic pronunciations and text page references at the beginning of each chapter. Nursing Care Plans with critical thinking questions help you understand how a care plan is developed, how to evaluate care of a patient, and how to apply critical thinking skills. A companion Evolve website includes animations, videos, answers to review questions and answer guidelines for critical thinking questions, an English/Spanish

audio glossary, critical thinking case studies, and additional review questions for the NCLEX examination.

The objective of the Handbooks programme is the preparation of critical reviews and evaluations of evidence on the cancer-preventive and other relevant properties of a wide range of potential cancer-preventive agents and strategies by international working groups of experts. In this volume on non-steroidal anti-inflammatory drugs the following drugs are reviewed: Aspirin, Sulindac, Piroxicam and Indomethacin. For each drug, their chemical and physical characteristics, occurrence, production, use, analysis and human exposure, metabolism, kinetics and genetic variation are studied, as well as their cancer-preventive effects, other beneficial effects, carcinogenicity and other toxic effects. A summary of data and recommendations for research are provided at the end.

For courses in maternal-child nursing, care of women and children, and women's health, for both 4-year BSN-level courses and selected ADN-level (2-year) programs. This is a family-focused text that provides comprehensive coverage of maternal-newborn nursing and women's health with special attention to evidence-based practice, cultural competence, critical thinking, professionalism, patient

education, and home/community care. Accurate, readable, personal, and engaging, it reflects a deep understanding of pregnancy and birth as normal life processes, and of family members as partners in care. This edition includes a deeper discussion of childbirth at risk; four new nursing care plans; updated coverage of contraception, complementary/alternative therapies, and much more. New features include Professionalism in Practice and Health Promotion Education boxes, Clinical Judgment case studies, and Critical Thinking questions. This edition also pays special attention to aligning with the AACN's Essentials of Baccalaureate Education for Professional Nursing Practice.

Foundations of Maternal-Newborn Nursing Elsevier Health Sciences

The evaluation of reproductive, maternal, newborn, and child health (RMNCH) by the Disease Control Priorities, Third Edition (DCP3) focuses on maternal conditions, childhood illness, and malnutrition. Specifically, the chapters address acute illness and undernutrition in children, principally under age 5. It also covers maternal mortality, morbidity, stillbirth, and influences to pregnancy and pre-pregnancy. Volume 3 focuses on developments since the publication of DCP2 and will also include the transition to older childhood, in particular, the overlap and commonality with the child development volume. The DCP3 evaluation of these conditions produced three key findings: 1. There is significant difficulty in measuring the burden of key conditions such as unintended pregnancy, unsafe abortion, nonsexually transmitted infections, infertility, and violence against women. 2. Investments in the continuum of care can have significant returns for improved and equitable access, health, poverty, and health systems. 3. There is a large difference in how RMNCH conditions affect different income groups; investments in RMNCH can lessen the disparity in terms of both health and financial risk.
