following the 15 ideas that Stan lays out in this book." - Bruce Temkin, author of *The Six Laws of Customer Experience* "Too often, the actual employment experience delivered on the job does not measure up to the version sold to job candidates during the interview process. From the author of *The Architecture of Happiness*, a deeply moving meditation on how we can still benefit, without believing, from the wisdom, the beauty, and the consolatory power that religion has to offer. Alain de Botton was brought up in a committedly atheistic household, and though he was powerfully swayed by his parents' views, he underwent, in his mid-twenties, a crisis of faithlessness. His feelings of doubt about atheism had their origins in

listening to Bach's cantatas, were further developed in the presence of certain Bellini Madonnas, and became overwhelming with an introduction to Zen architecture. However, it was not until his father's death -- buried under a Hebrew headstone in a Jewish cemetery because he had intriguingly omitted to make more secular arrangements -- that Alain began to face the full degree of his ambivalence regarding the views of religion that he had dutifully accepted.

Why are we presented with the curious choice between either committing to peculiar concepts about immaterial deities or letting go entirely of a host of consoling, subtle and effective rituals and practices for which there is no equivalent in secular society? Why do we bristle at the mention of the word "morality"? Flee from the idea that art should be uplifting, or have an ethical purpose? Why don't we build temples? What mechanisms do we have

for expressing gratitude? The challenge that de Botton addresses in his book: how to separate ideas and practices from the religious institutions that have laid claim to them. In *Religion for Atheists* is an argument to free our soul-related needs from the particular influence of religions, even if it is, paradoxically, the study of religion that will allow us to rediscover and rearticulate those needs.

Regional health care databases are being established around the country with the goal of providing timely and useful information to policymakers, physicians, and patients. But their emergence is raising important and sometimes controversial questions about the collection, quality, and appropriate use of health care data. Based on experience with databases now in operation and in development, *Health Data in the Information Age* provides a clear set of

guidelines and principles for exploiting the potential benefits of aggregated health data--without jeopardizing confidentiality. A panel of experts identifies characteristics of emerging health database organizations (HDOs). The committee explores how HDOs can maintain the quality of their data, what policies and practices they should adopt, how they can prepare for linkages with computer-based patient records, and how diverse groups from researchers to

health care administrators might use aggregated data. Health Data in the Information Age offers frank analysis and guidelines that will be invaluable to anyone interested in the operation of health care databases.

THE WORDS WE LIVE BY takes an entertaining and informative look at America's most important historical document, now with discussions on new rulings on hot button issues such as

immigration, gay marriage, gun control, and affirmative action. In THE WORDS WE LIVE BY, Linda Monk probes the idea that the Constitution may seem to offer cut-and-dried answers to questions regarding personal rights, but the interpretations of this hallowed document are nearly infinite. For example, in the debate over gun control, does "the right of the people to bear arms" as stated in the Second Amendment pertain to individual citizens or regulated

militias? What do scholars say? Should the Internet be regulated and censored, or does this impinge on the freedom of speech as defined in the First Amendment? These and other issues vary depending on the interpretation of the Constitution. Through entertaining and informative annotations, THE WORDS WE LIVE BY offers a new way of looking at the Constitution. Its pages reflect a critical, respectful and appreciative look at one

of history's greatest documents. THE WORDS WE LIVE BY is filled with a rich and engaging historical perspective along with enough surprises and fascinating facts and illustrations to prove that your Constitution is a living--and entertaining--document. Updated now for the first time, THE WORDS WE LIVE BY continues to take an entertaining and informative look at America's most important historical document, now with discussions on new

rulings on hot button issues such as immigration, gay marriage, and affirmative action.

In years past, the keywords for leaders were confidence, single-minded

purpose, and strategic planning. But today's vastly complex, globalized, and fast-evolving world requires a different kind of leadership. This game-changing book details a new approach—entrepreneurial leadership—developed at Babson College, the number-one school for entrepreneurship in the world. Entrepreneurial leadership is inspired by, but is separate from, entrepreneurship. It can be applied in any organizational situation,

not just start-ups. Based on two years of extensive research, it embraces three principles that add up to a fundamentally new worldview of business and a new logic of decision making. First, rapid change and increasing uncertainty require leaders to be “cognitively ambidextrous,” able to shift between traditional “prediction logic” (choosing actions based on analysis) and “creation logic” (taking action despite considerable unknowns). Guiding this

different way of thinking and acting is a new view of business, where simultaneous creation of social, environmental, and economic value is the order of the day. Finally, entrepreneurial leaders leverage their

understanding of themselves and their social context to guide effective action. Each chapter offers concrete examples of how educators across all disciplines are integrating these ideas into their courses—and even their

entire curricula. The New Entrepreneurial Leader lays out a comprehensive new paradigm for reinventing management education in order to mold leaders who will shape social and economic opportunity.
