This intensive lexical builder is addressed to B1-B2 intermediate learners of German, who are already capable of reading easy German stories, and who would like to enrich (and/or refresh) their vocabulary up to the advanced level in order to approach more complex German texts. Each piece of vocabulary is embedded in at least three example sentences in order to appeal to active understanding and trigger both short-term and long-term memory. Whenever possible, different meanings of the terms or expressions concerned are also illustrated. The vocabulary lessons are interspersed with concise but essential reminders of German grammar. At the end of the book, readers are offered a bilingual, paragraph for paragraph version of one of E. T. A. Hoffmann's famous stories, namely "Rath Krespel" (1818), translated in English by J. T. Bealby (1885). In each pair of bilingual paragraphs, important words to retain or recognize are emphasized in bold or underlined. Finally, the bilingual version is followed by the original, German only text of Hoffmann's novel - which readers are advised to go through, even if by now they know the narrative - since it is essential to retrieve and fully consolidate all learned German terms into their original context. This paperback comes with a free copy of the e-book version. NATIONAL BESTSELLER • For anyone who wants to learn a foreign language, this is the method that will finally make the words stick. "A brilliant and thoroughly modern guide to learning new languages."—Gary Marcus, cognitive psychologist and author of the New York Times bestseller *Guitar Zero* At thirty years old, Gabriel Wyner speaks six languages fluently. He didn't learn them in school—who does? Rather, he learned them in the past few years, working on his own and practicing on the subway, using simple techniques and free online resources—and here he wants to show others what he's discovered. Starting with pronunciation, you'll learn how to rewire your ears and turn foreign sounds into familiar sounds. You'll retrain your tongue to produce those sounds accurately, using tricks from opera singers and actors. Next, you'll begin to tackle words, and connect sounds and spellings to imagery rather than translations, which will enable you to think in a foreign language. And with the help of sophisticated spaced-repetition techniques, you'll be able to memorize hundreds of words a month in minutes every day. This is brain hacking at its most exciting, taking what we know about neuroscience and linguistics and using it to create the most efficient and enjoyable way to learn a foreign language in the spare minutes of your day.
