Bis heute prägt die Geschichte des 20. Jahrhunderts unsere Gegenwart. Das betrifft die politischen, sozialen und wirtschaftlichen Entwicklungen und Umbrüche ebenso wie die Geschichte des Christentums. Auch für den Religionsunterricht gilt: Aktuelle ethische oder religiöse Themen haben eine historische Perspektive. Ob es die Frage nach dem Christsein in Krieg und Diktatur oder die nach der Rolle von Kirche in der modernen Zeit ist – ohne Kenntnis der Kirchengeschichte des 20. Jahrhunderts können Schülerinnen und Schüler weder kompetent diskutieren, noch Neues in der Gegenwart erforschen. Dieser Band bietet daher erstmalig einen kompletten Überblick über zentrale Themen des 20. und des beginnenden 21. Jahrhunderts – mit praktischen Unterrichtsmaterialien für die Sekundarstufe I und II. Dazu gehören zum Beispiel: - Welche Rolle spielten die Kirchen im Ersten Weltkrieg? - Was waren die Handlungsmöglichkeiten von jungen

Christinnen und Christen im Nationalsozialismus? - Worin unterscheidet sich evangelikales von liberalem Christentum? - Gehören die christliche Botschaft und Menschenrechte und Demokratie zusammen? - Warum konnte die Kirche in der DDR im Herbst 1989 eine politische Rolle spielen? - Wie setzt sich die weltweite Kirche für die Gleichheit und Würde aller Menschen ein? - Welche Rolle spielen Glauben und Kirche, wenn man seine Heimat verlassen muss? - Wie christlich ist die Diakonie im modernen Sozialstaat? - Welche Christinnen und Christen inspirieren mich in meinem Glauben?

Mit der Schreibmaschine gegen die Katastrophe Hill and Wang

Dokumentation der Tagung 2009 "Küsst die Faschisten, wo ihr sie trefft!" - "Ein kleiner dicker Berliner wollte mit der Schreibmaschine eine Katastrophe aufhalten." So charakterisierte Erich Kästner nach dem Zweiten Weltkrieg seinen einsam im Exil gestorbenen Weltbühne-Kollegen Kurt Tucholsky. Doch nicht nur dieser schrieb in der Weimarer Republik gegen den Faschismus an. Zu den linken Publizisten, deren Kampf gegen den Aufstieg Hitlers und der Nationalsozialisten in diesem Band beschrieben wird, gehörten auch Carl von Ossietzky, Kurt Hiller, Erich Mühsam und

Friedrich Wolf. Neben Tucholsky haben Ossietzky und Mühsam das Ende der Katastrophe, die am 30. Januar 1933 ihren Anfang nahm, ebenfalls nicht mehr erlebt. Über die Einzelporträts hinaus werden drei Streitschriften vorgestellt, die zu Beginn der dreißiger Jahre die Nazi-Bewegung untersuchten und vor dem Sieg des Faschismus warnten. Dass die linke Publizistik in dieser Epoche alles andere als geeint dem gemeinsamen Feind gegenüberstand, ist ebenfalls Gegenstand der Analyse.

Don't Call Me Ishmael Undercover Publishing House

Could it be magic...? Chemical experiments are not only essential for teaching chemistry, they also fascinate the audience. This book is an excellent source of inspiration for every 'magic show' and classroom demonstration. In a very playful manner, the experiments described here open up the manifold, colourful, and sometimes ear-splitting world of chemistry. Ranging from unusual (but useful) properties of matter to the illustration of the greenhouse effect, this masterful chemist's 'cookbook' is highly suitable for preparing demonstrations in front of larger audiences. Building a bridge between science and the arts, every experiment is introduced by inspiring citations from

prose and poetry, which makes reading and experimenting equally enjoyable. 'The remarkable achievement of Herbert Roesky's and Klaus Möckel's book is the linkage it achieves between the world of the human spirit, expressed in literature and historical continuity, and the art of chemical demonstration. One expects Goethe to move freely in the pages of 'Chemical Curiosities', but Whitman, Nietzsche, Thomas Mann, Salvador Dali, Montaigne and the Prophet Jeremiah! ... The chemical and literary strands of this book are so ably intertwined.' Roald Hoffmann

This book is the best-known work of Engels, and in many ways still the best study of the working class in Victorian England. It was also Engel's first book, written during his stay in Manchester from 1842 to 1844. Manchester was then at the very heart of the Industrial Revolution and Engels compiled his study from his own observations and detailed contemporary reports. This edition includes the prefaces to the English and American editions, and a map of Manchester.

The Modern Break-Up PONS

Bestselling author Sherman Alexie tells the story of Junior, a budding cartoonist growing up on the Spokane Indian Reservation. Determined to take his future into his own hands, Junior leaves his troubled school on the rez to attend an all-white farm town high school where the only other Indian is the school mascot. Heartbreaking, funny, and beautifully written, The Absolutely True Diary of a Part-Time Indian, which is based on the author's own experiences, coupled with poignant drawings by Ellen Forney that reflect the character's art, chronicles the contemporary adolescence of one Native American boy as he attempts to break away from the life he was destined to live. With a forward by Markus Zusak, interviews with Sherman Alexie and Ellen Forney, and four-color interior art throughout, this edition is perfect for fans and collectors alike.

The Short Stories of Langston Hughes This collection of forty-seven stories written between 1919 and 1963--the most comprehensive available--showcases Langston Hughes's literary blossoming and the development of his personal and artistic concerns. Many of the stories assembled here have long been out of print, and others never before collected. These poignant, witty, angry, and deeply poetic stories demonstrate Hughes's uncanny gift for elucidating the most vexing questions of American race relations and human nature in general.

Alltagstheoretisch geformte Überzeugungen zu historischem Lernen und zu gelingendem Geschichtsunterricht sind konsistenter Nährboden beruflicher Entwicklung. Welche Deutungsmuster und Sinnbildungen schreiben Novizen Geschichte zu? Welche Aufgaben und Ziele verfolgen sie mit dem Geschichtsunterricht und welche Gelingensvorstellungen offenbaren sich in ihren Transformationen? Von welchem fachprofessionellen Selbstverständnis lassen sie sich tragen? Die Ergebnisse dieser empirischen Studie im unmittelbaren Berufseinstieg (Referendariat) fordern die universitäre und schulpraktische Geschichtslehrerausbildung heraus.

Metaphysics and science have a long but troubled relationship. In the twentieth century the Logical Positivists argued metaphysics was irrelevant and that philosophy should be guided by science. However, metaphysics and science attempt to answer many of the same, fundamental questions: What are laws of nature? What is causation? What are natural kinds? In this book, Markus Schrenk examines and explains the central questions and problems in the metaphysics of science. He reviews the development of the field from the early modern period through to the latest research, systematically assessing key topics including: dispositions counterfactual conditionals laws of nature causation properties natural kinds essence necessity. With the addition of chapter summaries and annotated further reading, Metaphysics of Science is a much-needed, clear and informative survey of this exciting area of philosophical research. It is essential reading for students and scholars of philosophy of science and metaphysics.

Mike Klingenberg doesn't get why people think he's boring. Sure, he doesn't have many friends. (Okay, zero friends.) And everyone laughs at him when he reads his essays out loud in class. And he's never invited to parties - including the gorgeous Tatiana's party of the year. Andre Tschichatschow, aka Tschick (not even the teachers can pronounce his name), is new in school, and a whole different kind of unpopular. He always looks like he's just been in a fight, his clothes are tragic, and he never talks to anyone. But one day Tschick shows up at Mike's house out of the blue. Turns out he wasn't invited to Tatiana's party either, and he's ready to do something about it. Forget the popular kids: Together, Mike and Tschick are heading out on a road trip. No parents, no map, no destination. Will they get hopelessly lost in the middle of nowhere? Probably. Will they meet crazy people and get into serious trouble? Definitely. But will they ever be called boring again? Not a chance.

Excerpt: When, in 1933, We consented, Venerable Brethren, to open negotiations for a concordat, which the Reich Government proposed on the basis of a scheme of several years' standing; and when, to your unanimous satisfaction, We concluded the negotiations by a solemn treaty, We were prompted by the desire, as it behooved Us, to secure for Germany the freedom of the Church's beneficent mission and the salvation of the souls in her care, as well as by the sincere wish to render the German people a service essential for its peaceful development and prosperity. Hence, despite many and grave misgivings, We then decided not to withhold Our consent for We wished to spare the Faithful of Germany, as far as it was humanly possible, the trials and difficulties they would have had to face, given the circumstances, had the negotiations fallen through. It was by acts that We wished to make it plain, Christ's interests being Our sole object, that the pacific and maternal hand of the Church would be extended to anyone who did not actually refuse it. 4. If, then, the tree of peace, which we planted on German soil with the purest intention, has not brought forth the fruit, which in the interest of your people, We had fondly hoped, no one in the world who has eyes to see and ears to hear will be able to lay the blame on the Church and on her Head. The experiences of these last years have fixed responsibilities and laid bare intrigues, which from the outset only aimed at a war of extermination. In the furrows, where We tried to sow the seed of a sincere peace, other men - the "enemy" of Holy Scripture - oversowed the cockle of distrust, unrest, hatred, defamation, of a determined hostility overt or veiled, fed from many sources and wielding many tools, against Christ and His Church. They, and they alone with their accomplices, silent or vociferous, are today responsible, should the storm of religious war, instead of the rainbow of peace, blacken the German skies. 5. We have never ceased, Venerable Brethren, to represent to the responsible rulers of your country's destiny, the consequences which would inevitably follow the protection and even the favor, extended to such a policy. We have done everything in Our power to defend the sacred pledge of the given word of honor against theories and practices, which it officially endorsed, would wreck every faith in treaties and make every signature worthless. Should the day ever come to place before the world the account of Our efforts, every honest mind will see on which side are to be found the promoters of peace, and on which side its disturbers. Whoever had left in his soul an atom of love for truth, and in his heart a shadow of a sense of justice, must admit that, in the course of these anxious and trying years following upon the conclusion of the concordat, every one of Our words, every one of Our acts, has

been inspired by the binding law of treaties. At the same time, anyone must acknowledge, not without surprise and reprobation, how the other contracting party emasculated the terms of the treaty, distorted their meaning, and eventually considered its more or less official violation as a normal policy.

Twenty-three centuries after its compilation, 'The Politics' still has much to contribute to this central question of political science. Aristotle's thorough and carefully argued analysis is based on a study of over 150 city constitutions, covering a huge range of political issues in order to establish which types of constitution are best - both ideally and in particular circumstances - and how they may be maintained. Aristotle's opinions form an essential background to the thinking of philosophers such as Thomas Aquinas, Machiavelli and Jean Bodin and both his premises and arguments raise questions that are as relevant to modern society as they were to the ancient world.

"When it comes to dating, I seem to be going around in a circle. The ones I want don't want me, and the ones who want me, I don't want." -Amelia "I don't know, I just think there's too much miscommunication between guys and girls. I mean, no one knows what the fuck is going on. We need to have the discussion. We need to vent it and get it out in the open," I said, grabbing my drink from the bedside table. _____ sat on the edge of the bed and put his shirt back on. "What do you want to know?" "I just want to know what guys are thinking. I mean we have sex and stuff and nothing lasting ever comes of it," I said, taking a cigarette out and lighting it. I knew I shouldn't be smoking in the room, but I was too drunk to care. "I don't think I should say. We don't know everything girls are thinking. I think some things are better left unsaid." "I want to know. I'd prefer shit to be clearer, because I'm always confused," I replied. I could tell he was still a bit sexually frustrated, but he seemed okay to chat. "Go ahead then, ask what you want. I'll try give it to you as straight as I can. But don't hate the messenger," _____ responded, taking the champagne from my hand and having some. "I won't, promise. So why do guys act so interested and then not get in touch at all? ?" I asked. Excerpt taken from The Modern Break-Up.
