The chemical study of archaeological materials Archaeological Chemistry, Second Edition is about the application of the chemical sciences to the study of ancient man and his material activities. The text of the book centers on the use of chemical methods, but also refers to the contributions of physics, biology, and genetics to archaeological research. Subjects discussed in the book include the determination of the nature of ancient materials, their provenance and age, the technologies used for the production of man-made materials, and the analysis of ancient human and animal remains (such as bone, dried blood, and coprolites), which yields information on ancient diets, kinship, habitancy, and migratory patterns. New developments in analytical chemistry and in related disciplines, which have contributed to archaeological research since the first edition of the book was published, are dealt within this edition, which also includes: \* Updated information on the study of the nature, age, and provenance of ancient materials \* New sections on organic, biological and genetic studies \* Glossary \* Extensive bibliography The book is intended primarily for archaeologists,

physical anthropologists and students of archaeology and physical anthropology, but will also be of use to conservators, curators, and art historians. Natural scientists reading it will become acquainted with advances in archaeological research which were made possible only by the application of chemical, physical, and biological methods and techniques.

Go on the trip of a lifetime. Two Wheels South shows you how to realize your own journey. Two friends take the motorcycle trip of their life--From Brooklyn to Patagonia. Matias Corea shares his insights on how to prepare, choose the right motorcycle, what to pack, how to plan the route, where to camp and last but not least: How to prepare your mind. Setbacks and breaking down are part of the adventure, but preparation and being on the road teach you the confidence to tackle any problem. Follow Matias Corea and his friend Joel through the American South, Central America over the Darien Gap and beyond, over wooden cracking jungle bridges in Colombia and to dry lake high plateaus in Argentina. Feel the character of the roads and the smell of nature: Riding a motorcycle is one of the purest forms of traveling. After 7 months and 13 countries Matias and Joel have learned a lot while riding down south on their trusty BMW air-cooled G / S overland haulers and are ready to share their experience. Two Wheels South invites you on the experience of a lifetime.

When he is diagnosed with cancer, in the silence of the hospital room broken only by the swish of cars outside, Italian writer Tiziano Terzani realizes that his whole life has been one long ride on a merry-go-round where he has always journeyed without a ticket. Now, for the first time, the ticket collector has come to demand his dues. At first, Terzani turns to Western medicine for a cure, but a question soon begins to haunt him: is cancer, as the doctors say, an enemy that needs to be destroyed, or is it a friend one can talk to? Travelling had always been a way of life for him, so he decides to make another trip, in search of a solution - to India. This final ride turns out to be very different though. And more difficult. Because every step, every choice - often between reason and faith, between science and magic - is inextricably linked to his own survival. As he crisscrosses the country from an ashram in Coimbatore to a hut in Almora, the external journey in search of a cure transforms into an inner journey and a return to the divine roots of man. Then, one day, as he looks at the sun rising over the mountains, he stumbles upon the one truth that has eluded him: death is as desirable and eternal as life itself. A bestseller in Europe, this is a book about modern medicine and alternative cures, and the quest to understand the true meaning of mortality.

Warned by a Hong Kong fortune-teller not to risk flying for a year, Tiziano Terzani, a vastly experienced Asia correspondent, took his first step into an unknown world. Traveling by foot, train, bus, car, and boat, and consulting soothsayers and shamans along the way, Terzani discovered as never before the complex traditions and unexpected delights of the people and lands he had been reporting on for years. "I was marked for death, " writes Terzani, "and instead I was reborn."

Sculptural nudes immortalized through black and white pictures by a great contemporary photographer. Barbieri's approach to nude photography has been a lengthy one, slow and carefully planned. He first explored the subject in his book trilogy, *Tropici*. These experiments, however, did not quite satisfy him: his fear of vulgarity, his yearning to illustrate the world according to his own personal vision, whereby even the crudest scenes must be ennobled, and his search for a suitable technique were issues that absorbed his mind for years. Barbieri's nudes appear natural, direct, life like, rich, joyous, and marked by dazzling expressive purity and simplicity. These photographs bring together the prehistoric approach to the human body, the aesthetic pursuit of classical Greek beauty, and the Renaissance rediscovery of freedom. All this is expressed through an outstanding studio technique. This book represents an homage to natural exuberance in all of its forms. Without any contrived prudishness or fear of the banal, and with a child like happiness and innocence, it plays upon the thin red line that has never clearly divided so-called pure art from polluted art, poetry from vulgarity, the sacred from the profane. A must-have for anyone interested in fine photography, fashion, and the beauty of the nude form.
