Ludwig Heinrich von Nicolay (1737-1820) is virtually unknown in

our time. Yet at the close of the eighteenth century he enjoyed a considerable reputation as a German poet of the French neo-classical orientation. He was esteemed as tutor to the Russian Emperor Paul I, as Russian State Counciller, and as President of the Russian Imperial Academy of Sciences. Moreover he was a friend of the most prominent eighteenth century minds that left their imprints on modern thought. As such a man, Nicolay may be studied from several points of view, as a writer, as an educator and as an intellectual. My first preoccupation with Nicolay was of a literary natur- which resulted in a doctoral dissertation presented to the University of Michigan at Ann Arbor (1960), under the title "Ludwig Heinrich von Nicolay (1737-1820) as an exponent of neo-classicism. " The existence of the Nicolay

archives, now in the possession of the Countess von der Pahlen in Helsinki, was not known to me at the time. Having later gained access to the same, I discovered a vast amount of unpublished documents and a treasury of correspondence with the leading intellectuals of the eighteenth and the beginning of the nineteenth centuries. Much of this material was to be published in conjunction with the late Count N. von der Pahlen, who unexpectedly and unfortunately died in 1963.

"This book is designed so to combine reading and grammar that interest in the former may act as a stimulus to the mastery of the latter. The work is divided into four parts: reading matter, exercises for translation into German, inflectional forms and rules of syntax, and vocabulary."--Preface.

A Student Grammar of German is an invaluable reference guide for undergraduates and other intermediate and advanced students. Written with the needs of the learner very much in mind, it sets out the grammar of the language in a clear and jargon-free way. Each chapter starts with an overview of the main grammatical terminology and concepts; these terms are also cross-referenced in the glossary at the end of the book. To provide a visual guide through each chapter, the main points in each section are highlighted, and tables summarise important patterns. 'Tip' boxes, which help the student to master particular points, are scattered through the text. Every point has numerous illustrative examples, each with its translation, carefully chosen from a wide range of printed and electronic media - books, newspapers, magazines, film and chat-rooms - to reflect contemporary usage across a range of registers.

John Baldwin and Guy Gellatly find that the strategic decisions young firms make play a critical role in determining their odds for survival and growth. New small firms survive by developing a core set of business skills - skills related "inter alia" to management, human resources, marketing and financing.

Advanced innovation capabilities related to R & D and technology set high-performance firms apart from other businesses. Industry-level differences in product lifecycle, production activity, competitive intensity and science base all influence the nature of small-firm innovation.
