"If diets worked, we'd all be thin by now. Instead, we have enlisted hundreds of millions of people into a war we can't win." What's the secret to losing weight? If you're like most of us, you've tried cutting calories, sipping weird smoothies, avoiding fats, and swapping out sugar for Splenda. The real secret is that all of those things are likely to make you weigh more in a few years, not less. In fact, a good predictor of who will gain weight is who says they plan to lose some. Last year, 108 million Americans went on diets, to the applause of doctors, family, and friends. But long-term studies of dieters consistently find that they're more likely to end up gaining weight in the next two to fifteen years than people who don't diet. Neuroscientist Sandra Aamodt spent three decades in her own punishing cycle of starving and regaining before turning her scientific eye to the research on weight and health. What she found defies the conventional wisdom about dieting: ·Telling children that they're overweight makes them more likely to gain weight over the next few years. Weight shaming has the same effect on adults. ·The calories you absorb from a slice of pizza depend on your genes and on your gut bacteria. So does the number of calories you're burning

right now. ·Most people who lose a lot of weight suffer from obsessive thoughts, binge eating, depression, and anxiety. They also burn less energy and find eating much more rewarding than it was before they lost weight. ·Fighting against your body's set point—a central tenet of most diet plans—is exhausting, psychologically damaging, and ultimately counterproductive. If dieting makes us fat, what should we do instead to stay healthy and reduce the risks of diabetes, heart disease, and other obesity-related conditions? With clarity and candor, Aamodt makes a spirited case for abandoning diets in favor of behaviors that will truly improve and extend our lives. **Grand Theft Weight Loss** McGraw Hill Professional
 Diets are failing in an epic way. Chances are you've tried one of the popular diets out there. The Atkins Diet, The South Beach Diet, The Zone Diet, The Blood Type Diet, The Eat Clean Diet, The Alkaline Diet, The Ornish Diet, The Insert Name Here Diet.You probably lost some weight... for awhile. Did you keep it off? Chances are you didn't. In fact, chances are you regained it all back and possibly then some. You aren't alone. Six out of seven people who are overweight are able to successfully lose weight during their lifetime. But 85-95% of them will fail at keeping it off in the long term. If this sounds bad, consider that ½-¾ of those people will add back on more weight than

they lost in the first place! If this cycle is repeated it can turn into 'yo-yo dieting', quite possibly one of the worst things you can do for your mental and physical health. Ask anyone and they will tell you that you need to lose weight and keep it off and prevent yo-yo dieting, but no one gives you an idea of HOW to accomplish that. What makes our book different? We discuss WHY diets fail on a physiological, psychological, and sociological level so you can better understand why what you did previously did not work. Then we also detail the MOST IMPORTANT behaviors, methods, and traits for losing weight and KEEPING IT OFF. This book is for everyone who wants to lose weight and keep it off, especially for those frustrated and hopeless chronic dieters tired of trying all the popular diets only to repeatedly fail. There is still hope to be found in these pages. Please give us the chance to guide you.

Simple, Everyday Habits for a Lifetime of Leanness If you feel like you've tried every fad diet in town and you're still carrying extra weight, Lean Habits is your answer. With easy tweaks to everyday decisions, you'll enjoy your meals, have tons more energy and most of all, you'll achieve long-term weight loss success without food restrictions. Georgie Fear is a registered dietitian and nutrition expert whose specialty is one-on-one coaching to help people lose weight permanently. Lean Habits is her personalized plan. It is not a diet; it's a lifestyle. Other diets that dictate calorie counting or food restrictions simply don't work because they're not sustainable. You lose the weight only to gain it back when you get sick of avoiding all your favorite foods. What does work are small, personalized changes to your lifestyle—like learning to sense when you are truly hungry, and recognizing the signs to stop eating at "just enough"—which lead to healthier eating habits that you practice every day. Lean Habits will help you understand your relationship with food, your habits that are keeping you from weight loss and how you can start listening to your body's real needs. Simple modifications will be your stepping-stones to a healthy life in which you lose weight while still eating the food you love. Georgie's strategy is founded on rock-solid modern scientific data and is accessible to everyone—even those who love chocolate. This is the weight-loss guide for real people, so, if you're ready to get started on your real-life weight loss journey, take a deep breath and let's get lean!

You are often told that eating less and exercising more are the keys to losing weight; but even with multiple plans and temporary successes, you fail to find lasting results with this old method. Yuri Elkaim's The All-Day Fat-Burning Diet provides the solution with his 5-Day Calorie Cycling Formula that sets your metabolism to lose up to 5 pounds a week. This plan eliminates the causes of weight gain and pushes the reset button on your fat-burning capacity. No combination of calorie cutting,

exercising, or restrictive dieting will help you look and feel great unless you set your body to burn fat and lose weight all day, all night, when you're not eating or working out—24/7. In The All-Day Fat-Burning Diet, Elkaim reveals rarely discussed "fat triggers" along with an easy and innovative way to double weight loss in just 3 weeks. Based on a powerhouse blend of nutritional know-how, fitness experience, and solid science, Elkaim's four-pronged approach features (1) strategically cycling calories and carbohydrates; (2) eating "clean and lean" foods that reduce "fat triggers" in the body; (3) exercising more intelligently; and (4) improving the body's ability to repair and avoid burnout. This proven program will reset your body to your desired factory settings and supercharge your metabolism to burn fat on autopilot—no matter age, fitness level, or health status.

#1 NEW YORK TIMES BESTSELLER • The game-changing author of Tribe of Mentors teaches you how to reach your peak physical potential with minimum effort. "A practical crash course in how to reinvent yourself."—Kevin Kelly, *Wired* Is it possible to reach your genetic potential in 6 months? Sleep 2 hours per day and perform better than on 8 hours? Lose more fat than a marathoner by bingeing? Indeed, and much more. The 4-Hour Body is the result of an obsessive quest, spanning more than a decade, to hack the human body using data science. It contains the collective wisdom of hundreds of elite athletes, dozens of MDs, and thousands of hours of jaw-dropping personal experimentation. From Olympic training centers to black-market laboratories, from Silicon Valley to South Africa, Tim Ferriss fixated on one life-changing question: For all things physical, what are the tiniest changes that produce the biggest results? Thousands of tests later, this book contains the answers for both men and women. It's the wisdom Tim used to gain 34 pounds of muscle in 28 days, without steroids, and in four hours of total gym time. From the gym to the bedroom, it's all here, and it all works. You will learn (in less than 30 minutes each): • How to lose those last 5-10 pounds (or 100+ pounds) with odd combinations of food and safe chemical cocktails • How to prevent fat gain while bingeing over the weekend or the holidays • How to sleep 2 hours per day and feel fully rested • How to produce 15-minute female orgasms • How to triple testosterone and double sperm count • How to go from running 5 kilometers to 50 kilometers in 12 weeks • How to reverse "permanent" injuries • How to pay for a beach vacation with one hospital visit And that's just the tip of the iceberg. There are more than 50 topics covered, all with real-world experiments, many including more than 200 test subjects. You don't need better genetics or more exercise. You need immediate results that compel you to continue. That's exactly what The 4-Hour Body delivers.

A bestselling author's groundbreaking eating plan that challenges the notion that starch is unhealthy From Atkins to Dukan, the fear-mongering about carbs over the past few decades has

reached a fever pitch; the mere mention of a starch-heavy food is enough to trigger a cavalcade of shame and longing. In The Starch Solution, bestselling diet doctor and board-certified internist John A. McDougall, MD, and his kitchen-savvy wife, Mary, turn the notion that starch is bad for you on its head. The Starch Solution is based on a simple swap: fueling your body primarily with carbohydrates rather than proteins and fats. This will help you lose weight and prevent a variety of ills. Fad diets come and go, but Dr. McDougall has been a proponent of the plant-based diet for decades, and his medical credibility is unassailable. He is one of the mainstay experts cited in the bestselling and now seminal China Study—called the "Grand Prix of epidemiology" by the New York Times. But what The China Study lacks is a plan. Dr. McDougall grounds The Starch Solution in rigorous scientific fact and research, giving readers easy tools to implement these changes into their lifestyle with a 7-Day Quick Start Plan and 100 delicious recipes. This book includes testimonials from among the hundreds Dr. McDougall has received, including people who have lost more than 125 pounds in mere months as well as patients who have conquered lifethreatening illnesses such as diabetes and cardiac ailments.

The Warrior Diet Penguin

This work is an examination of what makes us fat. In his book Good Calories, Bad Calories, the author, an acclaimed science writer argues that certain kinds of carbohydrates, not fats and not simply excess calories, have led to our current obesity epidemic. Now he brings that message to a wider, nonscientific audience. With fresh evidence for his claim, this book makes his critical argument newly accessible. He reveals the bad nutritional science of the last century, none more damaging than the "calories-in, calories-out" model of why we get fat, the good science that has been ignored, especially regarding insulin's regulation of our fat tissue. He also answers key questions: Why are some people thin and others fat? What roles do exercise and genetics play in our weight? What foods should we eat or avoid? Concluding with an easy-to-follow diet, this book is one key to understanding an international epidemic and a guide to improving our own health.

In his mid-twenties, Dave Asprey was a successful Silicon Valley multimillionaire. He also weighed 300 pounds, despite the fact that he was doing what doctors recommended: eating 1,800 calories a day and working out 90 minutes a day, six times a week. When his excess fat started causing brain fog and food cravings sapped his energy and willpower, Asprey turned to the same hacking techniques that made his fortune to "hack" his own biology, investing more than \$300,000 and 15 years to uncover what was hindering his energy, performance, appearance, and happiness. From private brain EEG facilities to remote monasteries in Tibet, through radioactive brain scans, blood chemistry work, nervous system testing, and more, he explored traditional and alternative technologies to reach his physical and mental prime. The result? The Bulletproof Diet, an anti-inflammatory program for hunger-free, rapid weight loss and peak performance. The Bulletproof Diet will challenge—and change—the way you think about weight loss and wellness. You will skip breakfast, stop counting calories, eat high levels of healthy saturated fat, work out and sleep less, and add smart supplements. In doing so, you'll gain energy, build lean muscle, and watch the pounds melt off. By ditching traditional "diet" thinking, Asprey went from being overweight and sick in his twenties to maintaining a 100-pound weight loss, increasing his IQ, and feeling better than ever in his forties. The Bulletproof Diet is your blueprint to a better life.

Scientists outside the dieting industry cracked the weight loss code without telling anyone. When brain researchers accidentally bumped into a technique that cuts hunger by 50%, for example, they didn’t publicize it. Why would they? They were studying memory, not weight loss. The science archives are full of hidden gems like this. In *Grand Theft Weight Loss*, health writer Michael Alvear pores over hundreds of peer-reviewed studies by leading neuroscientists, evolutionary biologists, and behavioral psychologists, ‘steals’ their most important discoveries and shows us how they can be used to cut hunger, quit sugar, stop overeating, and eliminate unhealthy cravings. *Steal Your Way To Skinny* No more yo-yo dieting, no more endless cravings, no more restrictive eating plans. Let brain researchers, Addiction Medicine specialists, evolutionary biologists, behavioral psychologists, and physiologists help you achieve what all those weight-loss experts couldn’t: Permanent weight loss.
